

Oliver Technologies Pty Ltd

COMPANY / CAPABILITY OVERVIEW

Oliver Technologies specialises in engineered solutions & equipment for:

- Abrasive blasting, spray painting facilities
- Air quality & ventilation systems

Our in house project team will ensure that the scope of your system will be understood, designed, planned, installed and commissioned on time whilst ensuring our customers receive value for money and meet or exceed the goals expected of the system. Our project team consists of:

- Project Engineer
- Mechanical Engineer
- In-house drafting (CAD Design)
- Quality, Safety & Environmental Management
- In-house fabrication and installation teams
- Trained after sales service teams and local technical support

CAPABILITY

- Automated and manual blast & paint systems
- Air quality & ventilation solutions for dust and fume creating applications (including fume created during welding applications)
- Custom designs & installations
- Purpose built spray booths & blast rooms
- Sheet metal fabrication facility including spiral duct fabrication
- Surface & climatic inspection equipment
- Industry related PPE

COMPETITIVE DISCRIMINATORS

Oliver Technologies has had a long association with ASC Pty Ltd since the start of construction of the Collins-class submarines in the early 1990's. In 2011 we installed an equipment solution including all air management and extraction systems required for blasting and painting of ship blocks for the Air Warfare Destroyer program. In early 2020 we completed the supply and install of a Surface Treatment Line (building 20) and all blast and paint equipment and air quality / ventilation systems for building 18 of the Future Frigates Project. Our extensive experience coupled with an industry leading international supply chain network has positioned Oliver Technologies as a strong choice of supply partner for surface preparation, coating equipment & facility solutions to the Australian Shipbuilding and Defence Industry.

CERTIFICATIONS / ACCREDITATIONS

AS/NZS 4801:2001

ISO9001:2015

PARTNERS & CUSTOMERS

Oliver Technologies has established relationships with key suppliers in Europe and North America to ensure our customers are receiving the most innovative, efficient & environmentally friendly products available.

Some of our Key Global Suppliers include:

- Wiwa
- Rosler
- Sames Kremlin
- Airblast / Blastman

Some of our Key Customers include:

- BAE Systems
- ASC / AWD
- Thales Australia (Bendigo)
- Siemens

Innovations: Oliver Technologies designed, manufactured and supplied several portable extraction solutions used to provide air extraction in difficult to reach places where works were undertaken within the ship during fabrication on the Common User Facility (CUF).
