

EXCELLENCE LEADERSHIP INTEGRITY

Setting the benchmark in Australia for excellence in security services, critical risk management, emergency management, medical and training services.

Capability and Scope in Critical Risk Management

Established in 2004, Safety Direct Solutions (SDS) assists our clients effectively manage critical risk situations because we understand the tasks at hand and the associated risks involved. The critical-risk management team at SDS has the ability to consult with clients to develop and facilitate personalised safety/critical risk management, emergency response and rescue policies, plans and procedures.

A key differentiator is that SDS delivers critical risk services by former military, emergency services and employees with industry backgrounds who hold trade, engineering and safety qualifications.

This investment in our people enables us to contextualise with our clients and tailor plans depending on your needs by professionals with years of first hand experience.

- Critical Risk Management Team
- Site Access Controllers
- Isolations Officers
- Permit Officers
- Gas Testers
- Confined Space Sentries
- Rescue Personnel
- Fire Fighting Capabilities
