

We are **passionate** in partnering with owners of **critical** equipment to provide **value**

CAPABILITIES

- Complex fabrication
- High tolerance CNC machining
- WAAM Additive Printing - AML3D
- In-house surface treatment
- Product assembly
- Through process NDT testing
- Through process material traceability
- Production operations MRP system
- CAD design & drafting
- MDR report management

DISCRIMINATORS

- 10,000sqm manufacturing facility
- 28 years experience in Defence Industry supply
- Trusted defence supply across Land & Naval customers
- End-to-end manufacturing capability
- Diverse across market sectors – Defence, Mining, Power, Water
- Enduring customer relationships – Business established in 1947
- 100% South Australian owned and operate

- ISO 9001 QMS ISO 45001 OHSMS
- ISO 3834:1 Welding ISO 14001 Enviro

PROJECTS

Century Engineering is an Australian-owned, multi-disciplinary advanced manufacturing company, delivering end-to-end engineering solutions for the Defence sector and other critical industries. Based in Adelaide's Edinburgh North defence precinct, we employ over 210 highly skilled personnel and offer vertically integrated in-house capability, including CNC machining, specialised welding and fabrication, industrial painting, and complex mechanical assembly.

Our experienced trades teams work seamlessly with our quality and project management departments to deliver precision, build-to-print equipment – from prototyping through to full-rate production – aligned with Defence standards and sovereign requirements.

We are a proven partner to Defence primes across all major Australian naval platforms, including:

- Hunter Class Frigate Build
- Collins Class Submarine Build & Sustainment
- Hobart Class Air Warfare Destroyer Build
- Canberra Class Landing Helicopter Dock Build
- ANZAC Class Frigate Build
- Arafura Class Offshore Patrol Vessel
