

## ▶ Company Profile

PRP is an integrated manufacturing and engineering company delivering products and solutions using rubber, foam, plastics, composites and other specialised materials.

## ▶ Competitive Advantage

- Australia's only integrated manufacturer specialised in composites, plastics and soft materials
- Over 30 years of engineering and manufacturing knowledge
- Australia's most diverse in-house capability for soft material manufacturing
- Extensive technical support network leveraging multi-disciplinary solutions
- Comprehensive international supply chain

## ▶ Capability Discriminators

### CNC COMPUTER CUTTING

- State of the art facility featuring 5-axis router, waterjet, knife, laser, die press, and 3d printing technologies
- Tolerancing to +/- 0.02mm
- Catering to all materials, in both high and low volume production

### INTEGRATED SOLUTIONS

- Design, engineering, project management, production and sub-assembly integration
- Extrusion, mouldings and more through our expansive technical support network
- MRP software developed in-house to maximise production efficiency

### MATERIALS & SUPPLY CHAIN

- Rubber, sponge, foam, insulation, fibre, plastic, composites, metals, and more
- Trusted long-standing supply chain with compliance, accountability, and traceability
- 30 years knowledge and experience in soft materials

## ▶ Product Discriminators

### PROTECTIVE PACKAGING & FOAM INSERTS

- Leading hard case suppliers including Pelican, SKB, Nanuk, Max
- Fire retardant, anti-static, and FDA foam varieties
- Custom packaging with CAD and 3D scan capabilities

### SOUND AND THERMAL INSULATION

- Temperature ranges from -100°C to +1000°C
- Products with both high and low thermal conductivity
- Acoustic panels and foams addressing sound dampening and attenuation

### GASKET AND SEALS

- Gaskets and seals from rubber, sponge, foam, fiber and metallic varieties
- Materials addressing temperature, chemical resistance, and pressure
- Compliance to international standards

### EMI, RF, RCS, GAP PADS

- Intricate gap pads for electronics and circuit boards
- Thermal conductive materials, EMI shielding, RF/RCS reduction
- Suppliers of products from Parker, Bergquist, Hexcel, Laird and more

### COMPLEX MACHINING

- 5-axis machining to tight tolerances and high precision
- Rubber, foam, plastics and composites
- Brackets, plates, mounts, dampening pads, gaskets, panels, strips, profiles

### VIBRATION, IMPACT AND SHOCK

- Foams designed to reduce vibration, shock, impact and mechanical stress
- Foam properties to maximise dampening, or rebound
- Polyethylene (PE), polyurethane, polysulfone, melamine, silicone and more

## ▶ Partners & customers
