

## AllianceSA Member Companies – May 2026

**AllianceSA connects industry with trusted South Australian businesses—ready to deliver individually or as scalable project teams.**

What sets AllianceSA apart is our structure. While each member business operates independently, we are aligned by shared values, commercial focus, and a commitment to collaboration. This creates a flexible and dependable model for government and industry, providing streamlined access to a coordinated network of suppliers who already work together and have a proven ability to deliver.

We bring capability across a wide range of sectors, including defence, infrastructure, advanced manufacturing, marine, mining, energy, water, renewables, and agriculture. Hydrogen and other emerging technologies are also within scope, reflecting our adaptability and future focus.

Together, our members represent a combined workforce of around 600 skilled professionals. This gives AllianceSA the scale to support projects of all sizes, with the flexibility to engage as needed.

**Whether you are looking for a specialist provider or a fully integrated delivery team, AllianceSA offers one coordinated point of contact for engaging South Australian capability that is trusted, proven, and easy to work with.**

## AIWER - Australian Institute of Work-integrated Education and Research

[www.aiwer.edu.au](http://www.aiwer.edu.au)

The Australian Institute of Work-Integrated Education and Research (AIWER) is an innovative Registered Training Organisation (RTO Code: 46175) focused on preparing learners for real-world success. Based in South Australia, AIWER delivers practical, industry-aligned training in key areas such as Engineering, Information Technology, and Leadership & Management—helping individuals build skills that employers genuinely need.

What sets AIWER apart is its strong connection with industry and its genuine commitment to both students and employers. By integrating real workplace practices into its training, AIWER ensures that learners graduate not only with knowledge and technical skills, but also with the confidence and capability to apply them effectively in professional environments.

## Fibre Composites

[www.fibrecomposites.com.au/index.html](http://www.fibrecomposites.com.au/index.html)

Fibre Composites was founded in 1999 out of Dry Creek South Australia, in a factory covering approximately 3000 \meters. It has since become one of the biggest general fiberglass manufactures in Australia, dealing with a number of high priority companies, and dealing with anything from horse float roofs to other more intricate fibre glassing jobs.

Recently the company has expanded and positioned itself to maximise opportunities in a number of key markets within Australia. These markets include the Resource Sector, Transportation, Defence, Water and Infrastructure, as well as General Manufacturing.

### Matthew Arnold

E – [engage@cyberwyze.au](mailto:engage@cyberwyze.au)

A – Level 11, 88 Tribune Street, South Brisbane QLD 4101

## Naval Welding Institute

[www.navalweldinginstitute.com](http://www.navalweldinginstitute.com)

The Naval Welding Institute is based in Philadelphia in the USA. They provide education and training to US Shipbuilding standards for welding, metallurgy, additive manufacturing and non-destructive testing.

Alliance SA has been commissioned by the Naval Welding Institute to identify defence industry companies and people wishing to learn and be trained to NAVSEA standards for the supply of goods and services into the Viginia Class Submarine (VCS) program (USA), for sustainment and maintenance of VCS and aircraft carriers built in Newport News, Virginia and Groton, Connecticut.

Alignment with DIVQ and AUSSQ programs is high on their radar.
