PURPOSE

MCT Brattberg Australia's high-quality sealing solutions enhance safety and reduce risk across defence, mining, maritime, rail, airports and more.

We deliver innovative solutions, customised to meet our clients' unique needs, backed by our commitment to safety and precision engineering, helping clients achieve their goals with confidence.

CAPABILITIES

Our flexible cable and pipe transits create critical seals, stopping hazardous elements from passing between compartments.

Our innovative design enables pressure seals, repair of corroded cabling and piping, as well as replacement and future upgrades, showcasing the flexibility our product offers in accommodating changes and additions to cables.

- Cable and Pipe Transits for land, sea, rail, aerospace and cabinets
- Built-in Electro Magnetic Compatibility (EMC) solution solution for EMI and EMP protection, also approved for grounding and bonding (G&B) applications

INDUSTRIES

MCT Brattberg's key innovative cable and pipe transit solution was developed together with Swedish shipyards to solve building and manufacturing process challenges. Today, our cable and pipe transits are crucial components in multiple defence and civilian industries, thanks to their effectiveness and versatility.
